

Hook trolley set for invasive surgery

Product code

7506473

Type

HAW 1000/605/1907 InvOP

FUNCTIONAL DESCRIPTION

The Hook trolley set for invasive surgery by Hupfer serves the provision of surgical accessories and the transport of sterile goods.

- Hygienic stainless steel surfaces ensure easy cleaning and maintain sterile conditions
- Three-sided hook rails provide versatile and secure hanging options for sterile goods baskets
- Case-specific equipment allows tailored organisation to meet surgical requirements efficiently
- High manoeuvrability with swivel castors and total locks enables smooth transport and stable positioning
- Durable stainless steel construction guarantees long-lasting performance and resistance to wear

EQUIPMENT FEATURES

Hygienic stainless steel surfaces

Hygienic stainless steel surfaces ensure a low-germ environment. The smooth, non-porous structure can be cleaned quickly and without leaving any residue. This saves you time, reduces cleaning costs and meets strict hygiene standards – ideal for commercial kitchens and medical areas. Robust, durable and reliable in daily use.

Hooks for sterile goods baskets

The integrated hook system enables the flexible attachment of mesh baskets, sterile supply containers and sterile supply baskets. Maximum flexibility for optimum use of space in sterile processing.

High Manoeuvrability: 4 swivel castors, 2 with total locks

Four smooth-running swivel castors, two with total locks, enable precise manoeuvring in tight spaces and secure locking during operation. This equipment ensures optimal mobility while maintaining high directional stability and security.

Case-specific equipment

The trolley is equipped with specially selected baskets and accessories that are perfectly tailored to the requirements of the respective department based on years of experience. This well thought-out configuration optimizes workflows and increases efficiency in everyday clinical practice.

3-sided hook rails

Maximum efficiency in the medical sector thanks to three-sided loading. The hook rails on three sides of the trolley maximize the use of space for medical products and instruments. Optimum capacity in the smallest space for professional work processes.

GENERAL TECHNICAL DATA

Width actual	1.000 mm
Depth actual	605 mm
Height	1.907 mm
Weight	36 kg

Project _____

Order _____

Quantity _____

Date _____

Payload	300 kg
---------	--------

Main material	Stainless steel
---------------	-----------------

HOOK PROPERTIES

Number of hooks	30
-----------------	----

Number of hook pairs	15
----------------------	----

Load capacity per hook	30 kg
------------------------	-------

Hook pitch	320 mm
------------	--------

MOBILITY

Set of castors	2 swivel castors with brakes 2 swivel castors
----------------	--

Castor attachment	Round pin
-------------------	-----------

Castor bearing type	Ball bearing
---------------------	--------------

Castor housing material	Plastic
-------------------------	---------

Wheel ø	100 mm
---------	--------

Type of tyre tread	Rubber – Standard
--------------------	-------------------

Wheels with thread guard	Yes
--------------------------	-----

Antistatic wheels	No
-------------------	----

Impact protection construction	Deflector rollers
--------------------------------	-------------------
